Asphalt Release Agent

- High Performance * High Temperature * Non VOC**
- * 100% Concentrate * Biodegradable**
- * Will Not Strip Asphalt**

Slip-Tec has a top distillation range of 600 to 800 Degrees (F), twice that of any other release agent.

Hot Mix temperatures, whether WMA or SMA will not cook the Slip-Tec residual off metal or rubber surfaces. The heat of the asphalt allows Slip-Tec to plate out and form a bond to the surface making each application perform better than the previous.

Slip-Tec Yields Maximum Obtainable Tonnage per Container... With Our Reliable Manual Applicator

Use our Tec-Matic Automated Drive Through System with a 55-gallon drum of Slip-Tec for optimum performance.
