

TEC-SHIELD RTU

OUR BEST-SELLING EQUIPMENT
LUBRICANT / ASPHALT RELEASE PRODUCT

Tec-Shield RTU is the answer for both superior equipment lubrication release from sticking asphalt.

TEC-Shield RTU prevents asphalt from sticking to metal and rubber surfaces in the first place, Therefore, cleaning becomes much easier.

Tec-Shield RTU is recommended by many leading equipment manufacturers- including Roadtec, Thermo-lay, Volvo Road Machinery, Vogeles, and more.

Why Tec-Shield RTU?

Clean and well lubricated surfaces **WILL NOT** allow asphalt to stick in the first place.
NO MORE harsh solvents and ineffective release agents.

Costs 70 to 80% less to use than Diesel Fuel

- **More than DOUBLE the life of Wear Parts**
- **Provides Corrosion Proofing To All Mobile Equipment**
- **Lubrication of slat conveyors, etc. can save you big money!**
- **Avoid repeated Emergency Maintenance and Breakdowns!**
- **Eliminates Crews Exposure to "Diesel Fuel" every working day!**
- **Protects Rubber Components; Belts, Tracks & Tires**

Tec-Shield RTU can **MORE** than **DOUBLE** the life of bar and chain assembly components.
12 to 20 percent reduction in amperage on Slat Conveyor start-up and to drive the system.

Molecularly bonds to metal providing excellent protection on components. Significantly reduces down-time due to asphalt build-up related problems, as well as reducing labor costs in cleaning and repairs.

Provides Cold start up protection (no jerking)

Provides rust protection and corrosion inhibition

No dangerous fume accumulation within enclosed systems Produces

NO HAZARDOUS WASTE
