

# TECLON-PRO

## Equipment Lubricant /Truck Bed Asphalt Release

### Performance as a Truck Bed Release:

**TECLON-PRO** has a distillation range of 600-800 degrees Fahrenheit and is not affected by the 300+ degree temperatures of asphalt. This important characteristic allows the residual of the lubricant to remain on the truck bed and **not evaporate** after contact with hot mix asphalt.

**TECLON-PRO** far exceeds the boiling points and distillation ranges of vegetable oils, soaps, diesel fuel and the temperatures of hot mix asphalt.

Boiling Points / Ranges  
(in degrees Fahrenheit)
